PORTA-53WF

Maximum external dimensions of the product (width x height):

1090 x 3000 mm

Maximum external dimensions of the door frame (width x height):

1090 x 2500 mm

PORTA-53WF TECHNICAL DESCRIPTION

PORTA-53WF is portal system with wooden door and aluminum frame.

The symbol "WF" in the product name means a door frame with an overlight and a wooden door panel. The glass of the overlight is connected to the adjacent glasses with glass tape.

The portal can be assembled with 2 different door panels:

- SU-010 is a door panel with a thickness of 41 mm.
- SU-050 is a door panel with a thickness of 54.5 mm.

Standard single-panel door frame widths are: M7 (690mm), M8 (790mm), M9 (890mm), M10 (990mm). The standard door frame height is M21 (2090mm). It is also possible to order paired doors, double doors, doors with glass openings and doors of special size.

Possible coatings for the door panel are:

- painted according to RAL, NCS or Tikkurila colour catalogues.
- covered with natural or technical veneer, which may be stained and varnished, varnished with tinted varnish or painted.
- laminated (the edges of the door panel are either veneered or painted).

The door frames are made of aluminum. The standard surface finish of aluminum profiles is natural (silver) anodizing but it is also possible to order a painted surface according to the RAL colour catalogue.

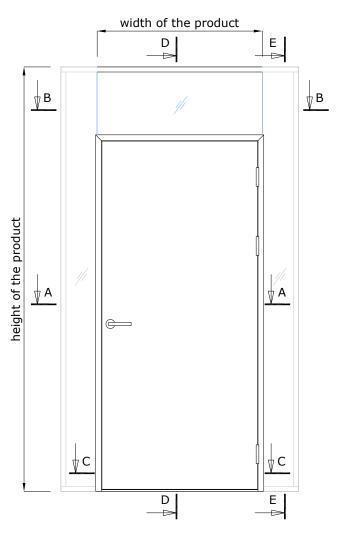

The thresholds are made of oak. It is also possible to order an automatically descending seal.

Maximum external dimensions of the door frame (width x height):	1090 x 2500 mm
Maximum external dimensions of the product (width x height):	1090 x 3000 mm
Minimum solid door panel width:	250 mm
Minimum door panel width with a glass opening:	560 mm

The standard lock case is ASSA 565-50 and the counterpart ASSA 2864. It is also possible to order other lock cases and counterparts.

The standard solution uses Abloy 3248 hinges. Other hinges can also be used (incl. hidden hinges).

Openable side section ELZONE-92A can be installed on one or both sides of PORTA-53WF, which is ideal for connectors, switches, cabling, etc. Minimum width of the side section when installing electrical accessories is 140mm. More information about side sections under the product "ELZONE-92A".
